Art Unit: 1651

1. Receipt is acknowledged of the preliminary amendment filed October 30, 2003 and the prior art information disclosure statement filed March 03, 2004.

2. Claims 1-15 and 26-27 are now pending in this application.

Claims 16-25 and 28-40 have been cancelled.

3. Claims 1-15 and 26-27 are rejected under the judicially created doctrine of double patenting over claims 1, 12, 14 and 16-19 of U. S. Patent No. 6,767,543 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter as noted by the claimed subject matter of claims 1, 12, 14 and 16-19.

It is also noted that the language of claim 1 which requires steps (b) and (b) whereby the first culture is subjected to a first stage of agitation without indicating the rate as well as the time which can be one second or less which culture is considered to be a second culture that is agitated at a second rate which does not have any "predetermined rate" that may be considered to have no patentable difference.

Thus, it is considered that the patented claims process steps which stops or separates the insolubles and further process the second culture at a pH within the

Art Unit: 1651

instantly claimed language renders the claims double patenting based on the doctrine noted in the following paragraphs:

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. The following is a quotation of the second paragraph of 35

U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 and 26-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter

Art Unit: 1651

which applicant regards as the invention with respect to the "first predetermined rate" and "second predetermined rate". What are these rates? What is "period" in the expression "period of time" that is necessary to obtain the second stage?

5. **No claim is allowed.**

6. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
